How We Broke the Tie During the Architect Selection Process | During our architectural firm presentations, the evaluation committee scored each firm based on approach, overall experience, and understanding of FISH and project scope. After all scores were submitted, we found ourselves with a tie between two firms. To make a fair and transparent decision, we followed the tie-breaking process outlined in our RFP guidelines. First, we looked at how each committee member individually ranked the firms. The firm that received the most **1st place votes** across all committee members rose to the top. This allowed us to determine the highest-ranked firm without needing to go further into secondary rankings or revisit earlier scoring.
